Cars can
OVERHEAT
rapidly . . .

AND

So can
CHILDREN
left in them!

Tips for Preventing Child Heatstroke in Cars

- Never leave your child alone in the car.
- Create reminders and habits so you know exactly where your child is or should be.
- Look before you lock.
- Always keep unattended car doors and windows closed and locked.
- Take action if you see a child left alone in a car; call 9-1-1 and follow their directions.

Each year an
average of 37 US children die
from overheating while alone in cars.
