Cars can OVERHEAT rapidly... AND So can CHILDREN left in them!

**Tips for Preventing Child Heatstroke in Cars**

- Never leave your child alone in the car.
- Create reminders and habits so you know exactly where your child is or should be.
- Look before you lock.
- Always keep unattended car doors and windows closed and locked.
- Take action if you see a child left alone in a car; call 9-1-1 and follow their directions.

Each year an average of 37 US children die from overheating while alone in cars.
