Example 6 – Ambulance Response with Patient Refusal of Care and Transport

Ambulance responds to a 911 call and arrives on scene to find a patient in need of assistance. However, the patient, after evaluation, refuses any treatment/care, and does not wish to be transported. In your opinion, you feel the patient should be transported. However, after a medication consult with a hospital, the patient still does not want to be transported. You were able to convince the patient’s family that further evaluation is necessary and they agree. They stated that they will transport their family member themselves for further evaluation.
